

International Grafting Day – Saturday August 5th 2017

On this grafting day you will learn how to propagate the Japanese maples.

Learning about the skills required, including one of the most important, how to sharpen a grafting knife. You will also learn how to use the rubber bands correctly and how to cut the scions and prepare the rootstocks.

This should bring us up to lunch time, catered by us.

After lunch you will learn how to graft. You can graft 12 different cultivars . We will provide all necessary scions etc. , and will carry out all after care that the grafted plants will need.

All the successfully grafted cultivars will be mailed to you at the appropriate time.

The price will be € 150,-- which includes the sending of the successfully grafted plants.

If you wish to take part and learn the grafting techniques we use, please register at

dvandermaat@gmail.com stating “grafting day 2017”.

After registration you will receive a confirmation email containing all the necessary information.

The grafting day will start at 10:00 am and will finish at approximately 3 pm.

Participation is limited.

You will find directions to our nursery on our website,

www.dvandermaat.com

We look forward to welcoming you at our nursery.

Marjan and Dick
